

Report Period ending:

31 March 2014

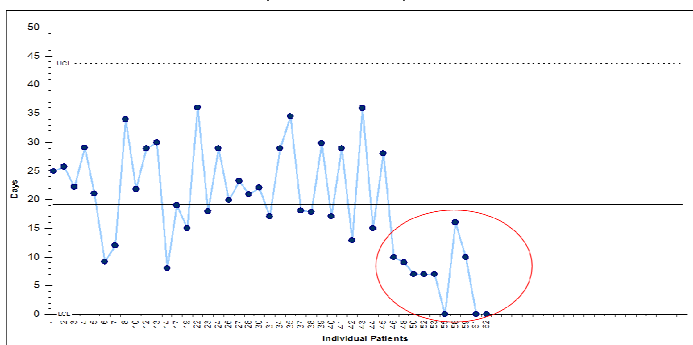

Campaign Sponsor Geraint Martin
 Campaign Manager: Diana Dowdle
 Campaign Clinical Leader Dr David Grayson

Progress

Will – engagement activities

The Supporting Life after Stroke Project was presented to senior stakeholders including Geraint Martin where the feedback was positive and very motivating for team. They presented data below which shows improvements in reducing the length of stay for patients on the programme.

Ward 23 Length of Stay for Patients with Mild to Moderate Stroke who are Eligible for Specialist Stroke Rehabilitation Services (Individuals chart)

*Mild to moderate stroke = FIM score of ≥ 65 on admission to rehabilitation ward or ESD

The Well Managed Pain (WMP) Collaborative heard very positive feedback from a clinician (during a CADS presentation about the challenge of opiate management in chronic pain) gave examples of collaboration and recommended contacting Leah (WMP pharmacist):

“The clinician did not know I was part of the project and spoke of several examples where pain and medication during hospital admissions for her patient group has been better managed and better communicated”.

Ideas/Opportunities

A challenge to sustain the gains – 7 Healthy Hearts programme participants completed the 8.4 km Round the Bays Event in March. They were supported by family/whanau, friends and staff.

The blog was written for Ko Awatea website: <http://koawatea.co.nz/we-did-it/>

The SMOOTH team have completed their final edit of the SMOOTH “How-To-Guide” and has gone for printing. The Delirium “How-to-Guide” is onto its final draft.

**Execution – Campaign Highlights:
measures/ monitor/modify**

The 16 Collaborative Project Reviews were completed on 25 and 27 March 2014. The standard of work presented across all the Collaborative teams was very impressive and inspirational. It was evident that many of the teams are highly engaged as they presented their work to the panel: Brandon Bennett, David Grayson and Diana Dowdle. Teams presented the evidence for:

- Readiness to Implement
- Change packages tested with data showing the improvement
- Engagement with the methodology
- Implementation checklist completed.

All teams received feedback from the panel and six teams requested further follow up sessions with Brandon Bennett.

Themes of the excellent work are that teams are making transformational change, have strong peer support and patient champions, are highly engaged supported by good leadership, have focused and scoped aims and identifying specific measures to support outcomes.

The Campaign team will continue to support the teams in preparing for the Learning Session 3 on 20-21 May 2014 and sustaining the improvements to achieve their aims by 30 June 2014.

Collaborative updates:

Delirium: The team is now developing a Spread Strategy and is in discussion with Zero Patient harm regarding the Delirium Management Pathway becoming under their responsibility.

ACE-Acute care for elderly: The ACE website is now up and running. Ward 5 nursing staffs have been surveyed regarding their confidence and knowledge around ACE patients. The results show an increase in confidence heading into this winter than the last year.

	<p>Franklin Health Rapid Response (FHRR): The FHRR video has been filmed (including a patient story) and is now in the process of being edited. The team are very encouraged by feedback they received at the Project Review regarding their progress.</p> <p>Gout Busters: New interest and potential involvement for testing the success of a new Gout health model at Otara Family & Christian Health Centre. The March clinic was able to identify four patients who could benefit from the assessment.</p> <p>SMART: A successful project review was presented by the collaborative team to the project review panel. Planned experimentation is developed around the pharmacy staffing coverage in Emergency Care to test the optimal staff rostering to best match the medical team admitting and patient influx.</p> <p>Environmental Cleaning: The Collaborative continues to wait for approval for the purchase of the Bioquell machines. As these machines have not been purchased, the collaborative within the Campaign has stopped.</p>
Budget	<p>All funding is still waiting for approval. SMOOTH, Better Breathing and Healthy Hearts Collaborative teams from Phase One continue to wait for approval for permanent funding for 2014-2015 financial year. On-going funding for 2014-2015 for the Beyond 20,000 Days teams also needs approval for year two. Uncertainty over future funding is creating a risk of losing staff. Some programmes are close to the point where they can no longer book assessment visits for patients if classes are not funded to continue in the next financial year.</p>
Communication	<p>All presentations, booklet, newsletter and videos may be found here: http://koawatea.co.nz/campaigns/20000-days-campaign</p>
Campaign Milestones	<p>See attached</p>

	Campaign Milestones Phase Two	Completion Date	Status ✓ on track ▲ at risk X behind schedule
