

### Monthly EC Presentations (growth ImR)

Emergency Care (EC) Presentations have shown a consistent growth pattern from July 2009 to date. There was a special cause with 8 points lying below the expected centreline, but this was not sustained with volumes returning to expected common cause variation

EHB Phase 1  
Ward 33,34  
June 2009

### Admissions (Xbar / XBarS)

Admissions have shown common cause variation only since the Edmund Hillary Building (EHB) was completed mid 2010

### Days between Dot Days (t-chart)

There was 1 Dot day in September – 2<sup>nd</sup> September (103 days between Dot days)

## Notes

As the scope of the Beyond 20,000 Days Campaign has expanded, the data for the admissions, length of stay and readmissions now includes ARHOP and Mental Health in addition to the Surgical and Medicine divisions.

The occupancy graph is now displayed as a rate to reflect the data shown in the Daily Dose e-newsletter. As there appears to be seasonality underlying the data the centreline (and hence limits) has been calculated with seasonal adjustment.

# Beyond 20,000 Days Campaign Dashboard September 2013

## Analysis

On 2<sup>nd</sup> September there was a second Dot day for 2013. This compares to 18 by September 30<sup>th</sup> in 2012 and 17 by August 31<sup>st</sup> in 2011

### 9am Occupancy Rate (Adjusted u-chart)

Even adjusting for seasonal variation, there is special cause throughout the occupancy rate graph.

### Average Length Of Stay (Xbar graph/XbarS)

Average length of stay has decreased from our baseline (July 2009-June 2011) and shown common cause variation at a reduced level since November 2011.

### Readmissions (P Chart)

Readmissions have shown common cause variation only

## EC Presentation

This graph represents the Average daily presentation to MMH emergency care.

Operational Definition

### Criteria

All presentation to MMH Emergency department  
This figures include adult and Paediatrics

## Admission

This graph shows the admission of acute adult patient admitted to Middlemore over a period of time.

### Operational Definition

Admission: Patient admitted to MMH inpatient wards for more than 3 hours from the 1st seen by time

### Criteria

Middlemore, Age >-15 years, Surgical (incl Gynae), Medical, ARHOP and Mental Health specialties

## Trigger /Dot Days

This Graph chart shows the days on which date the hospital was full and also the days between two Dot days. Hospital full days are also termed as Dot days. One of the aim is to minimise the Dot days and increase the time between Dot days. One of the contributing factor to achieve this is bed day saving

### Operational Definition

Dot Days: A day is referred as "Dot Day" when Middlemore central send an email when the Hospital is full.  
Date of Dot Days: The actual date when the email was sent.

### Criteria

All emails sent by Middlemore central with a subject "Hospital full"

**UCL:** Upper control Limit is automatically calculated by the software it selves.  
**CL:** Centre Line can also be called as Average.  
**LCL:** Upper control Limit is automatically calculated by the software it selves.  
  
Note: The graphs will help us to detect Shifts, Trends and variations. The lines within control limits indicate that the data is stable and in Statistical control.

## 20,000 Days Campaign Dashboard Definitions

## Occupancy

This graph reflects the occupancy rate (%) at the 9am census

### Operational Definition

Occupancy: numerator – the average number of beds occupied at 9am during the month  
Denominator – the average number of beds open at 9am

### Criteria

Middlemore, Age >-15 years, Surgical/Medical specialty (incl Gynae). Occupancy excludes: MSSU and Observation

## Average Length of Stay (ALOS)

This graph reflects the ALOS over a period of time.

### Operational Definition

LOS: Days between admission to discharge

### Criteria

Middlemore, Age >-15 years, Surgical (incl Gynae), Medical, ARHOP and Mental Health specialties

## Unplanned Re admission

This graph shows the readmission rate over a period of time.

### Operational Definition

Re-admission: numerator - An unplanned acute readmission to same speciality as discharged within 7 days  
Denominator – total number of admissions

### Criteria

Middlemore, Age >-15 years, Surgical (incl Gynae), Medical, ARHOP and Mental Health specialties. Data extracted based on Inpatient discharged location
