

Mt Wellington IHC Opioid Storyboard

Team members:

- - Clinical Leader : *Dr Minnie Strickland*
- - Nurse Leader: *Naomi Toalii*
- - Practice Administrator: *Toka Bates*

PHO & Facilitator: Alliance Health+ Trust – Philippa Little & Serena Davis

Organisational “Buy - In”

Aim:

To ensure there is a clear management plan put in practice for patients prescribed Opioids by a GP/ hospital.

The need for better Monitoring of Opioid prescriptions.

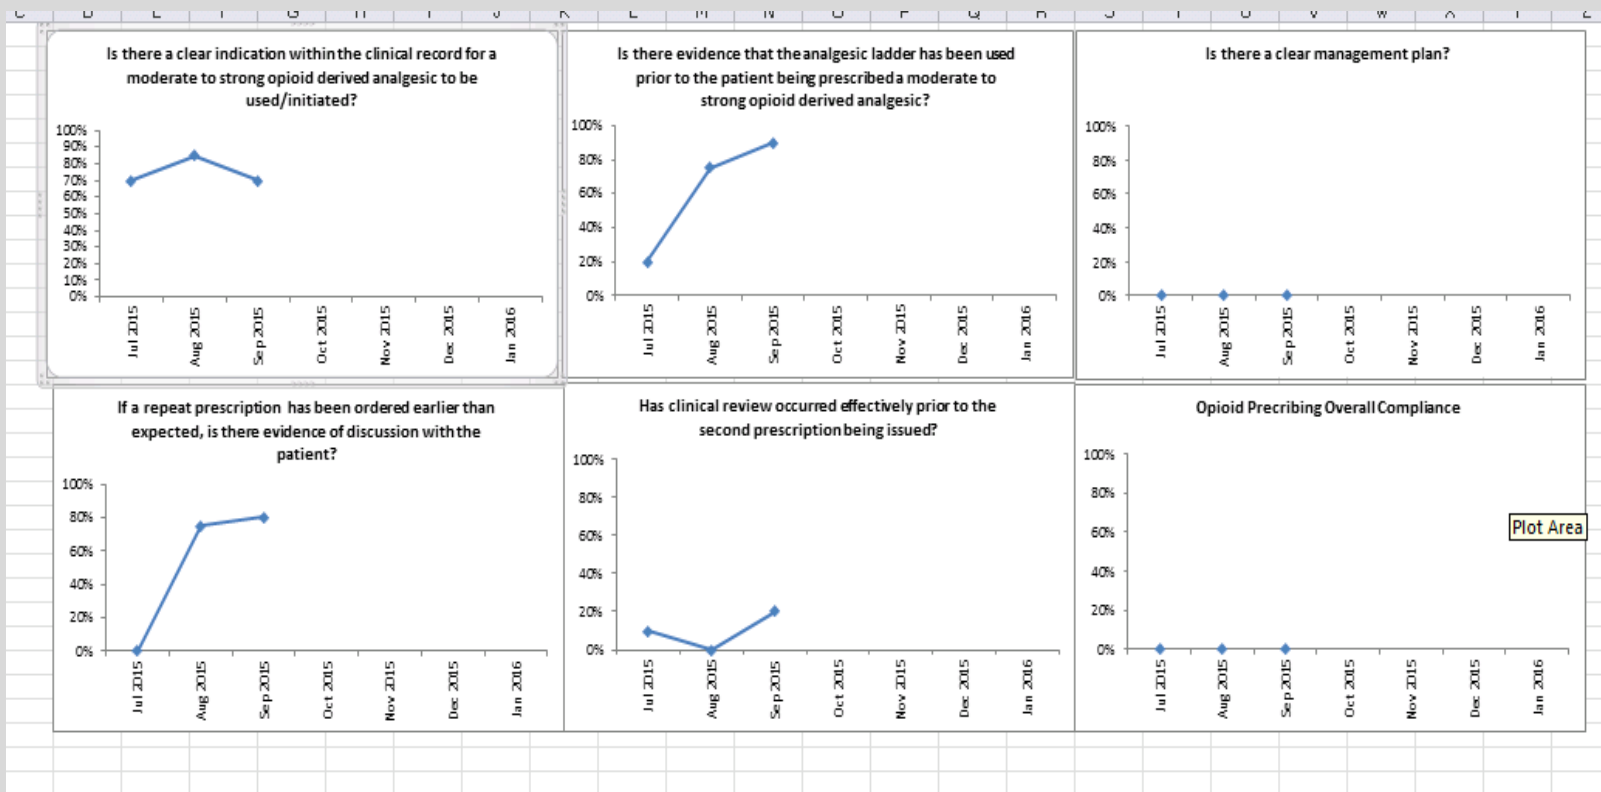

Buy-in

The collaborative team advise staff at meetings audit results & discuss as a team how we can improve better patient management.

Change Ideas

- Increased awareness of the rest of the staff regarding Opioids prescribing
- Data analysis has revealed opportunities of improvement in the process – yet to be actioned.
- Making it one of the priorities in our practice amongst the clinician – especially GP's prescribing.

Measures Summary

Highlights and Lowlights

- The collection of data has allowed the staff at Mt Wellington to have baseline data – this will allow improvement in the process to happen.
- Buy-in from the clinicians, allowing our team to share this project with them with special emphasis on the GP's who prescribe Opioids.
- Lowlight has been the understaffing over the last 3 months due to unforeseen circumstances. This has hindered progress with any changes.

Achievements to date

- The fact that we can measure data is an achievement.
- We have an agreed aim.
- The change package is yet to be determined.
- By the end of this project we would have made changes.
