

Learning Session One

National Early Learning Participation

The first learning session is a face-to-face exchange of ideas and learning from educators across the region.

This is an essential step in equipping you and your teams with the skills and knowledge to implement the Institute for Healthcare (IHI) Model for Improvement methodology. This is also an opportunity to include insights that you believe would deliver the best in quality education in your community.

Why should we attend?

Participation will provide the opportunity to:

- build on the work you are already doing
- develop your Model for Improvement knowledge from Ko Awatea's Improvement Advisors
- share ideas, knowledge and innovations that will support centres enrolment & attendance levels.
- identify and plan work for the action period.

Please complete the **Improving Together e-learning modules** prior to this Learning Session. This will help build your knowledge and understanding of the Model for Improvement.
