

Crawford Medical Centre

PHO and Facilitator: East Health Trust,
David Harrison

Team members: Dr R.Greenman, Dr
C.Macintosh, Yong Guo

Organisational “Buy - In”

Aim: to improve the diagnosis and management of patients with COPD-Which will focus on:

Correct diagnosis, assessing smoking risk in every patient, ensuring a chest xray/spirometry has been done ,review need for respiratory rehabilitation, check inhaler technique, and flu/pneumococcal vaccine is updated

- Buy-in:**
- 1. Better management of COPD patients- coordinated care with nurse and doctors.**
 - 2. Ensure improved auditing –copd +smokers.**

Change Ideas

Driver Diagram

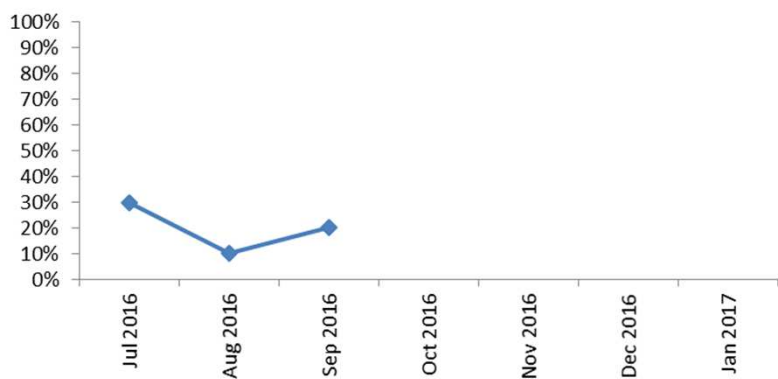

1. Medtec check list- to be entered for COPD.
This will help with auditing, updating care and planning
2. Nurses – spirometry and COPD Booklet –to work through care package
3. Doctors – to diagnose COPD Earlier- consider spirometry on symptomatic patients
- 4 use COPD next pathway ,BPAC copd pathway

What Changes have you tested?

	Change Tested	Outcome
1	We await medtec	
2	Spirometry screen on suspected COPD patients	Await data on how many spirometries done and COPD DIAGNOSIS
3		

Most Successful PDSA Cycles?

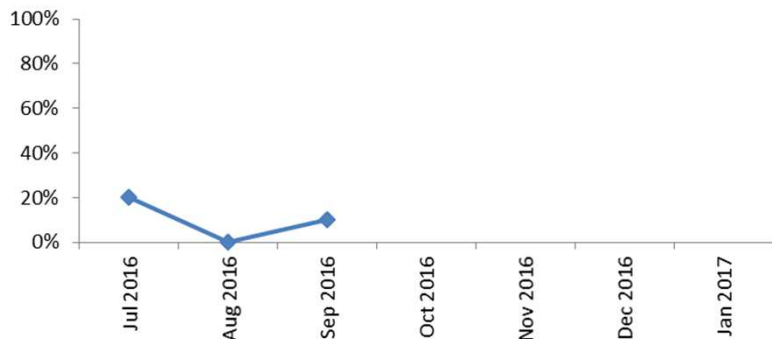

Is there an up to date smoking history recorded yearly in non-smokers and at every visit in smokers.?

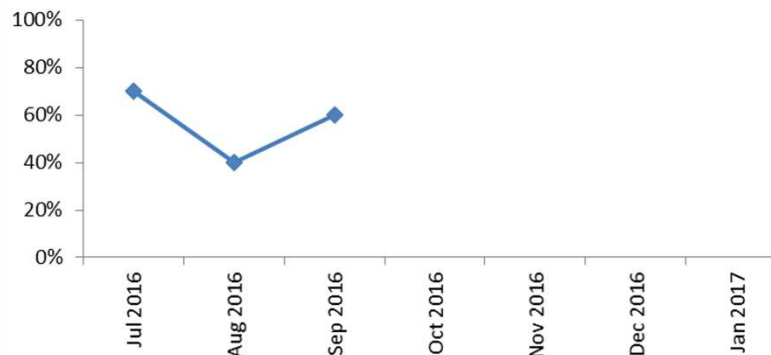

Has smoking cessation advice offered at every opportunity in the last year documented for all smokers?

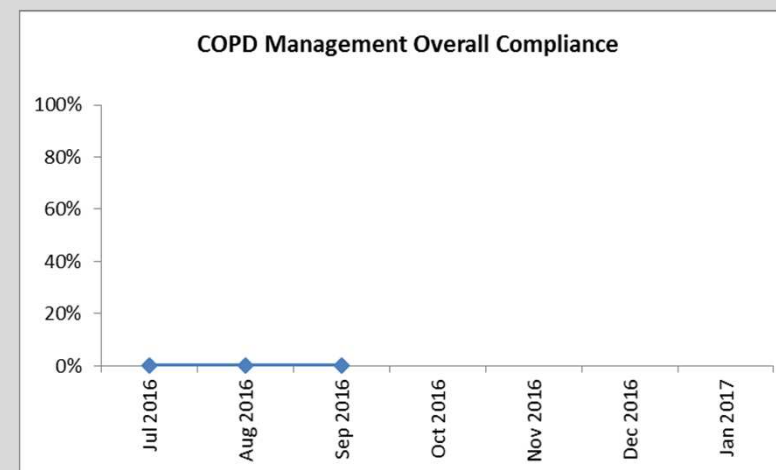

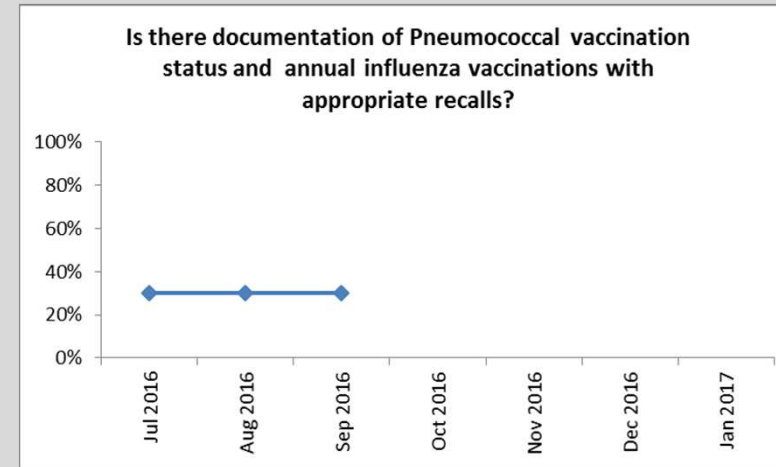

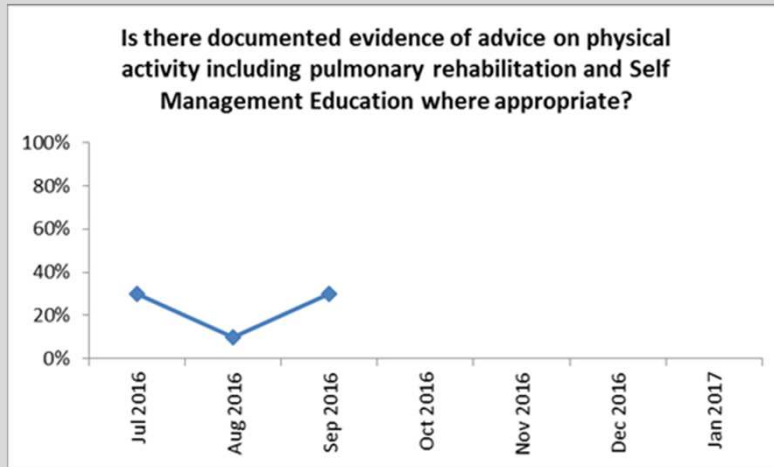

Has the patient's ability to use an inhaler device has been assessed by a nurse or doctor in the past 6 months?

Is there documented spirometry and chest x-ray for all patients with diagnosed COPD?

Measures Summary

Briefly describe what you are measuring and how and why? Include Dashboard

Multiple questions for COPD AUDIT.

Aim- to improve in all fields of questioning for whole team.

This will be more achievable with awaited MEDTEC copd document

Highlights and Lowlights

- What has been the experience of the team (General Practitioners, nursing and administrative staff and patients) in terms of their involvement in the improvements that have been made
- 1 early to say- team are keen to see improvements
- 2 Difficult to get team together. Fragmentation of information a problem.

Achievements to date

Do you have an

-agreed aim-yes

-a change package

-measurement plan- yes

Do people on your team know what their responsibilities are and what is expected of them?

Not fully .This will be aided by the med tec copd template

What has changed and what difference have the changes made? Too early to answer.

Any other achievements?

Having a new spirometer in the practice has been useful . Nurses now trained to do spirometry .Having an efficient one site medtec document which can be audited will be helpful regarding having the COPD information for each patient on one place.
